

## Technology Vision

### CSSU Technology Plan 21<sup>st</sup> Century Learning SCS Goals and Strategies

Stallman  
11/17/09

#### CSSU Technology Plan

1. *Information and media literacy skills.* Analyzing, accessing, managing, integrating, evaluating and creating information in a variety of forms and media. Understanding the role of media in society.
2. *Communication skills.* Understanding, managing and creating effective oral, written and multimedia communication in a variety of forms and contexts.
3. *Interpersonal and self-direction skills.* Becoming more productive in accomplishing tasks and developing interest in improving own skills.

#### From the Transformation of Education in Vermont: 21<sup>st</sup> Century Skills

- Critical thinking and problem-solving skills; inquiry and investigation
- Creativity and innovation
- Communication and collaboration skills
- Information and media literacy
- The ability to use information and communication technology
- Flexibility and adaptability; applied, project based and interdisciplinary learning
- The ability to demonstrate initiative, productivity and self-direction, as well as leadership, responsibility, ethics and accountability
- Social and cross-cultural skills
- Rigorous academics in traditional disciplines (English, math, science, and social studies) and expanded emphasis on 21st century disciplines (world languages, economics, entrepreneurship, personal finance, health, arts, ecology, political science).

#### SCS Goals

- Create a community of learners who successfully use technology tools to improve their knowledge and performance.
- Improve school/community communications
- Improve the transparency of the school to the community.

#### SCS Strategies

- Administrative leadership supports professional development and the vision of technology integration to support and enhance learning
- Action plan has technology embedded in each content area
- Technology purchases—hardware and software—will align with the goals above
